****Sequence 1: Abandoned Cart Recovery****

****Email 1****

****Subject:**** Lost revenue on [Company Name]

****Preview Text:**** Quick question about your cart recovery rate.

Hi [First Name],

Most e-commerce brands lose 70% of potential revenue to abandoned carts. If [Company Name] isn't recovering at least 15% of those, you're burning cash.

Our platform uses AI-driven dynamic discounts to nudge users back without hurting margins. We helped [Similar Competitor] boost recovery by 22% in 30 days.

Can I share a 2-minute Loom showing how this works?

Following up on my last note. Did you know that 40% of cart abandonments happen due to unexpected shipping costs?

Our tool pre-calculates these costs at the product page level, reducing friction before the user even checks out.

Worth a quick chat to see if this plugs a leak in your funnel?
