

AI Blog Writing System: 100 Prompts + SEO Template Pack

RenWork Digital Products

System Overview: The 2-Hour AI Blog Workflow

This system is designed to compress the traditional blog writing cycle--from keyword research to a published, SEO-optimized article--into under two hours. The core philosophy is "AI Drafts, Human Curates." You do not ask AI to write the entire article in one go; that leads to generic, low-quality content. Instead, you use AI as a specialized research assistant, structural architect, and first-draft engine.

****The Workflow:****

1. ****Keyword Selection (15 mins):**** Use your SEO tool (Ahrefs, SEMrush) to identify a target keyword with high intent and moderate competition. Define the "search intent" (informational, transactional, commercial).
2. ****Brief Creation (20 mins):**** Use ****Stage 1 & 2 Prompts**** to generate a detailed content brief. This includes the target audience, key questions to answer, and a list of 5-10 authoritative sources to cite.
3. ****AI Drafting (45 mins):**** Use ****Stage 3 & 4 Prompts**** to generate the outline first, then draft section-by-section. Never generate the whole article at once. Paste the brief into the AI, ask for an H2/H3 structure, then ask it to write one H2 section at a time, providing your own notes or data points for accuracy.
4. ****Human Editing & SEO (25 mins):**** Review the draft for tone, factual accuracy, and flow. Use ****Stage 5 Prompts**** to optimize meta descriptions, title tags, and internal linking opportunities. Ensure the primary keyword appears in the H1, first 100 words, and one H2.
5. ****Publishing & Promotion (15 mins):**** Format the post in your CMS. Use ****Stage 6 Prompts**** to create social media snippets and email teasers immediately, ensuring the content is distributed while it is fresh.

100 Prompts Organized by Stage

Topic Ideation (15 Prompts)

Goal: Find angles, gaps, and trending subtopics.

1. "Act as a content strategist. I am targeting the keyword [Keyword]. List 10 unique blog post angles that are not the 'generic overview' approach."
2. "Analyze the top 3 search results for [Keyword]. What specific questions are they failing to answer? List 5 gaps in their content."
3. "Generate 5 'contrarian' angles on [Topic] that challenge common industry advice but remain factually defensible."
4. "Identify 5 trending subtopics or pain points related to [Topic] that are currently getting high search volume but low content saturation."
5. "Create 5 'How-to' variations of [Topic] that target specific user personas (e.g., beginners, enterprise users, freelancers)."
6. "List 5 'Mistake' or 'Error' based article ideas related to [Topic] that address common user frustrations."
7. "Suggest 5 'Comparison' angles that position [Topic] against specific competitors or alternative methods."
8. "Generate 5 'Case Study' or 'Success Story' angles for [Topic] that focus on measurable results."
9. "What are 5 emerging technologies or trends in [Industry] that I can link to [Topic] for a forward-looking article?"
10. "Create 5 'Checklist' or 'Template' based article ideas that offer immediate utility to users searching for [Topic]."
11. "Identify 5 'Frequently Asked Questions' about [Topic] that are too complex for a single paragraph and deserve a full article."
12. "Generate 5 'ROI' or 'Cost-Benefit' analysis angles for [Topic] aimed at business decision-makers."
13. "List 5 'Seasonal' or 'Trending' hooks I can use to reframe [Topic] for the current quarter."
14. "Suggest 5 'Tool Review' or 'Software Stack' ideas that integrate [Topic] with popular platforms."
15. "Create 5 'Expert Opinion' or 'Interview' style article ideas that position me as a thought leader on [Topic]."

Research (20 Prompts)

Goal: Summarize sources, find stats, identify expert quotes.

16. "Summarize the key arguments from this article [Paste Link/Text] into 5 bullet points suitable for a blog post."
17. "Extract all quantitative data, statistics, and percentages from this text [Paste Text] and list them with their sources."
18. "Identify 3 unique insights or 'aha' moments in this source [Paste Text] that are not commonly cited in standard overviews."
19. "Find 5 reputable industry reports or studies from the last 2 years that support the argument that [Argument]."
20. "Summarize the methodology of this study [Paste Abstract] in plain English for a general audience."
21. "Extract direct quotes from this interview transcript [Paste Text] that can be used to illustrate [Point]."
22. "Compare the findings of Study A [Paste Text] and Study B [Paste Text]. What are the similarities and contradictions?"
23. "List 5 potential counter-arguments or criticisms against the general consensus on [Topic] based on recent literature."
24. "Identify key terminology or jargon in this text [Paste Text] that needs to be defined for a beginner audience."
25. "Find 3 real-world examples or case studies mentioned in this source [Paste Text] that illustrate [Concept]."
26. "Analyze this dataset [Paste Data] and identify the top 3 trends or outliers that are relevant to [Topic]."
27. "Summarize the regulatory changes mentioned in this legal brief [Paste Text] in simple terms for a business blog."
28. "Extract the 'Pro' and 'Con' points from this debate transcript [Paste Text] regarding [Topic]."
29. "Identify any outdated information in this text [Paste Text] that needs to be updated with current data."
30. "Find 5 reputable experts or authors who have written about [Subtopic] and list their key contributions."
31. "Summarize the user reviews from this product page [Paste Text] into a balanced list of pros and cons."
32. "Extract the step-by-step process described in this technical manual [Paste Text] and simplify it for a non-technical audience."

33. "Identify any missing variables or assumptions in this analysis [Paste Text] that I should address in my blog post."
34. "Find 3 recent news articles related to [Topic] that provide current context for my post."
35. "Summarize the key takeaways from this webinar transcript [Paste Text] into a structured list of action items."

Outline Building (15 Prompts)

Goal: Pillar-cluster structures, article hierarchy.

36. "Create a detailed outline for a 1500-word blog post on [Keyword]. Include H1, H2s, and H3s. Ensure the structure follows a logical problem-solution flow."
37. "Design a 'Pillar Page' outline for [Topic] that links to 5 sub-topics. List the core H2s and the specific sub-topics each should cover."
38. "Structure an outline for a 'Listicle' post on [Topic]. Provide 10 compelling H2 ideas that vary in length and complexity."
39. "Create an outline for a 'Comparison' post between [Product A] and [Product B]. Include sections for overview, features, pricing, use cases, and verdict."
40. "Design a 'Beginner's Guide' outline for [Topic]. Start with definitions, move to core concepts, and end with advanced tips."
41. "Structure an outline for a 'How-To' guide on [Task]. Break the process down into 5-7 clear, actionable steps (H2s)."
42. "Create an outline that addresses 5 common objections users have about [Topic]. Structure each H2 as a question."
43. "Design a 'Trend Report' outline for [Industry]. Include sections on current state, drivers, predictions, and action items."
44. "Structure an outline for a 'Case Study' blog post. Include: Background, Challenge, Solution, Implementation, Results, and Lessons Learned."
45. "Create an outline for a 'Checklist' article. The H2s should be categories, and the H3s should be the specific checklist items."
46. "Design an outline that integrates [Primary Keyword] and [Secondary Keyword] naturally. Show where each keyword should appear in the hierarchy."
47. "Structure an outline for a 'Mistakes to Avoid' post. List 7 major mistakes, and for each, include a subsection on 'Why it happens' and 'How to fix it'."

48. "Create an outline for a 'Tool Review' post. Include: Overview, Key Features, Pros/Cons, Pricing, Alternatives, and Final Verdict."

49. "Design an outline that uses the 'Answer the Question' format. Start with a direct answer
