AI Blog Writing System: 100 Prompts + SEO Template Pack

System Overview: From Keyword to Published Post in Under 2 Hours

This system is engineered to eliminate writer's block and reduce production time by 70%. It relies on a strict five-step workflow that treats AI not as a ghostwriter, but as a high-efficiency research assistant and structural architect.

****Step 1: Keyword Selection (15 Minutes)****

Identify your target keyword based on search intent, not just volume. Use tools like Ahrefs or Ubersuggest to find low-competition, high-intent terms. Define the specific problem the reader is trying to solve.

****Step 2: Brief Creation (15 Minutes)****

Feed the keyword and your unique value proposition into the "Topic Ideation" prompts below. Generate a specific angle that differentiates your post from the top three ranking competitors. Create a one-paragraph brief that outlines the core promise of the article.

****Step 3: AI Drafting (45 Minutes)****

Use the "Research" and "Outline Building" prompts to gather data and structure the skeleton. Then, use the "Writing" prompts to generate section-by-section drafts. **Crucially:* Do not ask for the whole article at once. Generate 300-500 words at a time to maintain coherence and depth.

****Step 4: Human Editing (30 Minutes)****

AI lacks nuance, personal experience, and brand voice. Your job is to inject "human touches": add personal anecdotes, correct factual hallucinations, vary sentence structure, and ensure the tone

matches your brand. Aim for a 40% rewrite rate on key sections.

****Step 5: Publishing & Optimization (15 Minutes)****

Run the draft through the "SEO Optimization" prompts to refine meta tags and internal links.

Finalize the formatting with headers and bullet points for skimmability.

100 Prompts Organized by Stage

Stage 1: Topic Ideation (15 Prompts)

1. Act as a senior content strategist. Given the keyword [KEYWORD], list 5 unique angles that are underserved in the current market.
2. Analyze the top 3 competitors for [KEYWORD]. What specific subtopics or questions are they ignoring?
3. Identify 5 trending subtopics related to [KEYWORD] that are gaining search volume but have low competition.
4. Create a "Pillar Cluster" map for [KEYWORD]. List 10 supporting articles that would link back to a main pillar page.
5. What are the common misconceptions people have about [KEYWORD]? List 5 misconceptions that could serve as article titles.
6. Generate 5 "How-To" titles that promise a specific, quantifiable result for [KEYWORD].
7. List 5 "Mistake" based titles (e.g., "7 Mistakes That Ruin Your [KEYWORD] Strategy") that appeal to fear of loss.
8. Suggest 5 comparison titles (e.g., "[KEYWORD] vs. [COMPETITOR]: Which is Right for You?").
9. Identify 5 questions people frequently ask about [KEYWORD] in forums like Reddit or Quora that are not well-answered.
10. Create 5 titles using the "Ultimate Guide" format that cover the topic from beginner to advanced.
11. List 5 case study angles where real-world examples of [KEYWORD] success are highlighted.
12. What are the 5 emerging tools or technologies related to [KEYWORD] that beginners should know

about?

13. Generate 5 titles that address the "Cost" or "ROI" aspect of [KEYWORD].
14. Suggest 5 titles that focus on the "Time-Saving" or "Efficiency" benefits of [KEYWORD].
15. List 5 "Checklist" or "Template" based titles that offer immediate utility for [KEYWORD].

Stage 2: Research (20 Prompts)

16. Summarize the top 5 key points from the article titled "[ARTICLE TITLE]" in 3 bullet points.
17. Find 5 recent statistical data points (from the last 2 years) related to [KEYWORD] that support the argument that [ARGUMENT].
18. Identify 3 credible industry experts who frequently write about [KEYWORD] and suggest a quote topic they might discuss.
19. Extract the main arguments from this text: [PASTE TEXT]. How do they differ from common industry beliefs?
20. List 5 common pain points users face when trying to achieve [GOAL] related to [KEYWORD].
21. What are the 3 most frequently cited risks or downsides of using [KEYWORD/TOOL]?
22. Provide a step-by-step breakdown of how [PROCESS] works, citing standard industry practices.
23. Compare the features of [TOOL A] and [TOOL B] regarding [SPECIFIC FEATURE]. List 3 key differences.
24. Find 5 real-world examples of companies that successfully implemented [KEYWORD] strategies.
25. What are the technical requirements or prerequisites needed to start with [KEYWORD]?
26. Summarize the key findings of the study "[STUDY NAME]" in plain English for a layperson.
