AI Blog Writing System: 100 Prompts + SEO Template Pack

Section 1: The System Overview -- From Keyword to Published Post in Under 2 Hours

This system is designed to eliminate "blank page syndrome" and streamline the content creation workflow. By leveraging AI for structural generation and data synthesis, while reserving human creativity for narrative nuance and factual verification, you can produce high-ranking, high-quality articles in a fraction of the traditional time.

****The 5-Step Workflow:****

1. ****Keyword Selection (15 mins):**** Use your keyword research tool (Ahrefs, SEMrush, or Ubersuggest) to identify 3-5 target keywords. Select one primary keyword and 2-3 secondary semantic variations.
2. ****Brief Creation (15 mins):**** Use the *Prompts Stage 1 (Topic Ideation)* to define the search intent. Are they looking for a solution, a comparison, or general knowledge? Define the target audience persona.
3. ****AI Drafting (45 mins):**** Use the *Prompts Stages 2 & 3 (Research & Outline)* to generate a detailed skeleton. Then, use *Stage 4 (Writing)* to draft sections sequentially. Do not ask for the whole article at once; ask for section-by-section drafts to maintain context and quality.
4. ****Human Editing & Fact-Checking (25 mins):**** Inject your personal voice, verify all statistics and quotes, and add unique insights or case studies that AI cannot generate. Ensure the tone matches your brand.
5. ****Publishing & Optimization (20 mins):**** Apply *Stage 5 (SEO Optimization)* prompts to refine

meta tags and internal links. Schedule the post.

Section 2: The 100 Prompts Library

Stage 1: Topic Ideation (15 Prompts)

Goal: Find angles, gaps, and trending subtopics.

1. List 10 long-tail keyword variations for [Primary Keyword] that target specific pain points.
2. Identify 5 common misconceptions about [Topic] that I can address in my blog post.
3. What are 5 emerging trends in [Niche] for 2024 that are currently under-discussed?
4. Analyze the top 5 competitors ranking for [Keyword]. What topics are they missing that I could cover?
5. Generate 5 controversial but defensible opinions about [Topic] that would spark engagement.
6. List 5 "how-to" questions people ask on Reddit related to [Topic].
7. What are 5 niche sub-topics within [Broad Topic] that have low competition but high intent?
8. Create 5 blog post titles that promise a specific, tangible result for [Target Audience].
9. Identify 5 "gap" topics: questions people ask that current top-ranking articles fail to answer fully.
10. List 5 seasonal angles for [Topic] that could be relevant in the next 6 months.
11. What are 5 case study ideas I can use to illustrate [Topic] without having original data?
12. Generate 5 "versus" comparisons involving [Topic] and its main alternatives.
13. Identify 5 common objections [Target Audience] has to [Topic] and how to address them.
14. List 5 unique perspectives on [Topic] that differ from the standard industry advice.
15. What are 5 "mistakes to avoid" lists I can write about regarding [Topic]?

Stage 2: Research (20 Prompts)

Goal: Summarize sources, find stats, and identify expert quotes.

16. Summarize the key arguments from [Source/Article URL] in 3 bullet points.
17. Find 5 recent statistics (2023-2024) related to [Topic] that support the argument that [Claim].
18. Identify 3 industry experts who frequently speak on [Topic] and suggest a quote format for each.
19. Compare the pros and cons of [Method A] vs. [Method B] based on general industry consensus.
20. List 5 credible sources (journals, reports, major publications) that cover [Topic] in depth.
21. Extract the main data points from this text: [Paste Data].
22. What are the 3 most common causes of [Problem] according to recent research?
23. Summarize the findings of [Specific Study Name] in plain English for a non-expert audience.

24. Find 5 examples of successful companies that have implemented [Strategy].
25. What are the 5 key metrics to track when measuring success in [Area]?
26. Identify 3 recent news events related to [Topic] that are relevant to this blog post.
27. Summarize the user journey for someone trying to achieve [Goal] in 5 steps.
28. What are the 5 most frequently cited barriers to adoption for [Technology/Product]?
29. List 5 definitions of [Term] from different authoritative sources to ensure accuracy.
30. Find 3 analogies or metaphors that can explain [Complex Concept] simply.
31. What are the 5 legal or ethical considerations surrounding [Topic]?
32. Identify 5 potential risks associated with [Action] and how to mitigate them.
33. Summarize the historical context of [Topic] in 3 sentences.
34. What are the 5 best tools available for [Task] and their primary differentiators?
35. Find 5 customer reviews or testimonials (general themes) that highlight the benefits of [Solution].

Stage 3: Outline Building (15 Prompts)

Goal: Pillar-cluster structures and article hierarchy.

36. Create a detailed H2/H3 outline for a 1500-word article on [Topic] targeting [Keyword].
37. Structure this article using the "Problem-Agitate-Solve" framework.
38. Create a "Pillar Page" outline that links to 5 cluster articles about [Niche].
39. Design an outline that answers the "Who, What, Where, When, Why, How" for [Topic].
40. Create a step-by-step tutorial outline for [Specific Task].
41. Structure a comparison post for [Product A] vs. [Product B] with sections for Pricing, Features, and Use Cases.
42. Create an outline that starts with a hook, moves to the core value, and ends with a strong CTA.
43. Design a "Listicle" outline with 10 items, ensuring each item has a unique sub-point.
44. Create an outline that addresses the top 5 search queries related to [Keyword].
45. Structure the article to move from beginner concepts to advanced strategies.
46. Create a "Myth-Busting" outline with 5 myths and the corresponding facts.
47. Design an outline that includes a FAQ section addressing the 5 most common questions.
48. Create a "Case Study" outline focusing on Challenge, Solution, and Results.
49. Structure the article to include a checklist or template that the reader can download.
50. Create an outline that integrates 3 external links and 2 internal links naturally.

Stage 4: Writing (25 Prompts)

Goal: Section-by-section drafting, intro formulas, and conclusion frameworks.

51. Write a compelling 100-word introduction for [Topic] that uses a question hook.

52. Write a 100-word introduction that starts with a surprising statistic.
53. Write a 100-word introduction that tells a short story about a fictional customer.
54. Draft Section 1: [H2 Heading] in 300 words, focusing on [Key Point].
55. Draft Section 2: [H2 Heading] in 400 words, including a bullet list of benefits.
56. Write a transition paragraph connecting [Previous Section Topic] to [Next Section Topic].
57. Draft a "Pro Tip" box that offers an insider secret about [Topic].
58. Write a conclusion that summarizes the 3 main points and includes a clear CTA.
59. Write a conclusion that poses a thought-provoking question to the reader.
60. Rewrite this paragraph to be more concise and active: [Paste Paragraph].
61. Expand this bullet point into a full 100-word paragraph: [Paste Bullet].
62. Write a "Common Mistake" section that warns the reader about [Specific Error].
63. Draft a section that compares [Option A] and [Option B] using a table format.
64. Write a "Step-by-Step" guide for [Action] with numbered instructions.
65. Create a "Checklist" section with 5 items the reader should verify.
66. Write a section that addresses the objection: "I don't have the time/budget for this."
67. Draft an "Expert Quote" placeholder section where I can insert a quote from [Expert Name].
68. Write a "Real-World Example"
