

# AI Blog Writing System: 100 Prompts + SEO Template Pack

---

## System Overview: From Keyword to Published Post in Under 2 Hours

This system is not about letting AI write your blog for you; it is about using AI as a high-speed junior editor and researcher to accelerate the 80% of blogging that is tedious, leaving you free to inject the 20% that is valuable: your unique voice, authority, and experience. The workflow is strictly linear to prevent scope creep.

**\*\*Step 1: Keyword & Intent Lock (15 Minutes).\*\*** Do not start writing until you have a specific primary keyword and a clear user intent (Informational, Transactional, or Navigational). Use your rank tracking tool to identify a keyword with a "low difficulty, high potential" ratio. Define the exact question the reader is asking.

**\*\*Step 2: The AI Brief (20 Minutes).\*\*** Feed the AI a structured brief containing: Target Audience, Tone of Voice, Primary Keyword, Secondary Keywords, and Key Takeaways. Use the prompts in the "Topic Ideation" and "Research" sections below to flesh out this brief. The AI's job here is to gather raw material, not to create the final text.

**\*\*Step 3: Structured Drafting (45 Minutes).\*\*** Never ask the AI to "write a blog post about X." That generates generic fluff. Instead, use the "Outline Building" and "Writing" prompts to generate content section by section. Start with the H2 headers, then draft the intro, then the body paragraphs, and finally the conclusion. This modular approach ensures logical flow and allows you to control the narrative arc.

**\*\*Step 4: Human Editing & SEO Integration (30 Minutes).\*\*** This is the non-negotiable step. Read every sentence. Remove AI clichés ("In today's fast-paced world," "It's important to note"). Inject personal anecdotes, specific case studies, or expert quotes that AI cannot know. Then, use the "SEO Optimization" prompts to refine meta descriptions and internal linking suggestions.

**\*\*Step 5: Publishing & Promotion (10 Minutes).\*\*** Upload to your CMS, generate social snippets using the "Promotion" prompts, and schedule. Total time: Under 2 hours. Quality: High, because the human element remains the driver.
