Job Interview Prep Pack: 50 Q+A Scripts + STAR Method Templates

Section 1: The STAR Formula Breakdown & Templates

The STAR method is the gold standard for behavioral interviews because it forces structure on chaotic memories. It moves you from vague anecdotes to concrete evidence of competence.

The 1-Page STAR Guide

* **S (Situation):** Set the scene in 1-2 sentences. Context is key. *When did this happen? What

was the business problem or environment? * Avoid excessive backstory.

* **T (Task):** Define your specific responsibility. *What was your goal? What was at stake? * Distinguish your role from the team's general effort.

* **A (Action):** The core of your answer (60% of the time). Use "I" statements, not "We." *What

specific steps did you take? What tools, strategies, or conversations did you initiate? * This proves your agency and skill set.

* **R (Result):** Quantify the outcome. *Did revenue increase? Did time decrease? Did morale improve? * If you don't have numbers, describe the qualitative impact (e.g., "The client renewed for another year," or "The process is now standardized").

8 Fill-in-the-Blank STAR Story Templates

Use these to pre-draft your top 8 stories before any interview.

1. Leadership
