

90-Day Content Calendar: Fill-In Templates + 90 Topic Ideas

Section: The Pillar Framework: Building Your Content Spine

Before you fill in a single day of your calendar, you must define the structural integrity of your brand. Most creators fail because they post randomly, leading to audience confusion and algorithmic suppression. Your content must sit at the intersection of what your audience cares about and what you are uniquely positioned to discuss.

To build a sustainable 90-day strategy, identify exactly three to five Content Pillars. These are the recurring themes that will anchor your messaging. Do not create more than five; this dilutes your authority.

****How to Select Your Pillars:****

1. ****The Expert Pillar:**** What specific problem do you solve? (e.g., "Email Conversion Optimization," "Beginner Yoga Mobility," "Small Business Tax Prep"). This is 40% of your content.
2. ****The Behind-the-Scenes (BTS) Pillar:**** Humanize the brand. Show the process, the failures, the workspace, or the team. This builds trust and is 20% of your content.
3. ****The Value-Add/How-To Pillar:**** Actionable tips, quick wins, or tutorials that provide immediate utility without requiring a purchase. This is 20% of your content.
4. ****The Social Proof/Community Pillar:**** Testimonials, case studies, user-generated content, or collaborations. This validates your claims. This is 10% of your content.
5. ****The Soft Sell/Conversion Pillar:**** Direct offers, webinars, or product launches. Keep this low-frequency to avoid fatigue. This is 10% of your content.

***Action Step:** Write down your 3-5 pillars below. Ensure each has a distinct "voice" or visual style so your audience can recognize the category instantly.

* ****Pillar 1:**** _____

- * **Pillar 2:** _____
- * **Pillar 3:** _____
- * **Pillar 4 (Optional):** _____
- * **Pillar 5 (Optional):** _____

Section: Platform-Specific Frequency Guide

Consistency beats intensity. Do not try to post daily on every platform. Tailor your output to the algorithm and user expectation of each channel.

Platform	Ideal Frequency	Best Time to Post (General)	Primary Goal
:---	:---	:---	:---
Instagram	4-5 Posts/Week + Daily Stories	11:00 AM - 1:00 PM	Brand Aesthetic & Community
LinkedIn	3-4 Posts/Week	8:00 AM - 10:00 AM (Weekdays)	Thought Leadership & Networking
Twitter/X	3-5 Tweets/Day	Scattered throughout day	Real-time Conversation & Traffic
TikTok	1-3 Videos/Week	6:00 PM - 9:00 PM	Viral Reach & Discovery

Note: Adjust these times based on your specific analytics after Week 2. The goal is to meet your audience when they are already engaged, not to force engagement.

Section: The 4-Quadrant Content Rotation

To prevent burnout and maintain engagement, rotate your content types using this 4-Quadrant Method.

Aim for this ratio across your monthly output:

- Educational (40%):** Teaches a skill, explains a concept, or provides a resource. **Goal:** Authority.*
- Entertaining (30%):** Humor, trends, relatable struggles, or storytelling. **Goal:** Shareability.*
- Personal (15%):** Opinions, values, personal stories, or "why" statements. **Goal:** Connection.*
- Promotional (15%):** Direct calls to action, product features, or service pitches. **Goal:** Revenue.*

Rule of Thumb: Never post three Promotional pieces in a row. Sandwich a hard sell between an Educational and a Personal post.

Section: 90-Day Topic Idea Bank

Organize your calendar by weeks. Each week focuses on a primary pillar but includes elements from

the others. Use the `[Brand Name]` placeholder to insert your specific business.
